

LS-A6D Flashlight

Main features:

- Lightweight and compact – only 239 g with 21700 rechargeable batteries.
- Waterproof housing with a phosphorescent silicone cover.
- "Warm" light delivers superior smoke penetration, richer color rendering, and optimal visual comfort.
- Two independent light sources, each controlled by a dedicated, large, glove-friendly button.
- Magnetic charging port allows for convenient in-device charging without removing the battery.
- Mounts securely to turnout gear using a rugged metal clip and carabiner.
- Includes a specialized strap with a silicone grip for secure placement on a head or helmet.
- Features a magnetic battery cap, allowing the flashlight to be attached to any metal surface for hands-free operation.
